EXPERIENCE

2020 - present

Dubai, UAE

Software Developer | BimmerTech

- Developed and maintained responsive and user-friendly websites using HTML5, CSS3, JavaScript, Bootstrap, jQuery, and Vue.js.
- Built modular and reusable components and libraries using the Vue.js ecosystem, including Vue CLI, Vuex, Vue Router, and Nuxt.js.
- Collaborated with designers to create user interfaces that are both visually appealing and intuitive.
- Ensured that websites and applications are compatible with a variety of browsers and devices, providing a seamless experience for all users.
- Integrated third-party APIs, such as ticketing systems and PayPal payment gateways, to enable smooth registration and ticketing processes.
- Optimized website performance by implementing techniques such as code minification, image optimization, and lazy loading, resulting in faster load times and improved user engagement.
- Worked closely with cross-functional teams, including designers, back-end developers, and project managers, to ensure efficient coordination and timely delivery.
- Conducted thorough testing and debugging of front-end code to identify and resolve issues, ensuring high-quality deliverables.
- Utilized version control systems to manage code repositories, track changes, and collaborate effectively with other developers.
- Stayed up-to-date with the latest frontend technologies, frameworks, and industry trends to continuously enhance skills and contribute to innovative solutions.
- Developed 100+ custom responsive HTML email templates for email marketing activities.
